## MORE FLIGHTS OPTIONS

- You can choose almost any scenic place on the planet and find a PC-6 dropping skydivers! Some great examples include Dubai, Grand Canyon, Lauterbrunnen, Fox Glacier.
- Nepal also features large numbers of challenging airstrips from Jomsom in the west to Lukla in the east.
- The Papuan and New Guinea (PNG) highlands are also dotted with a huge number of airstrips which are little more than tracks cut into the jungle. MSFS users should visit [flightsim.to](http://flightsim.to) for the increasing number of updates to the default PMG mesh and airstrips. Prepar3d and FSX users can also find both freeware and payware options. XPlane has more limited options, but given the PC-6 can land almost anywhere, I'm sure you'll find somewhere to put down!
